Subject: Hard disk

Hey James.....I've shipped out a hard disk with the OC simplification code and inputs, the 1950s post-dredge infill run, and the baseline, dredge/cap, and full dredge hydro/sediment model inputs/outputs. There is a table of contents included under LPR-NB/Vtoc, briefly describes the various directories, and should get you started with the run script/setup. Let me know if you have any questions or run into any issues with the files.

Rooni.
